

Use Case:

UI-Scribble:

A hand-drawn UI sketch of a form, likely for a recipe. The form is contained within a large rectangle. On the left side, there are five input field labels in boxes: `<input>` type: text, `<input>` type: text, `<input>` type: select, `<input>` type: select, and `<input>` type: select. These are connected by dashed lines to the corresponding form elements. The form elements include: a text input for "Name", a text input for "Beschreibung", a dropdown menu for "Zutaten" (with an upward arrow), a dropdown menu for "Wirkung" (with a downward arrow), a text input for "Extras", a text input for "Rezept" (with a label `=h1` above it), and a text input for "Preis".
